

## Stock Game Midpoint Check-in

You are now about 2/3 of the way through the class stock game. At the end of the class, you will need to create an overall presentation of your stock game performance, but at this point you will conduct a review of your progress so far.

Please prepare a “Check-In” report, reviewing your team’s progress so far. Your check-in report should be about one page in length, and discuss:

1. Your Team’s Current Ranking and Overall Returns. Is this higher or lower than you expected based on your original objectives?
2. Provide a short evaluation on how well your team has followed your original objective statements and team roles. Did your team need to make adjustments to the original plan, or have you been following the original plan?
3. List two real-world news events that had a major positive impact on your team’s portfolio (something that caused your investments to increase in value).
4. List two real-world events that had a major negative impact on your team’s portfolio (something that caused your investments to decrease in value).
5. Based on how your portfolio has been going so far, do you believe you should update your objective statement or team roles for the last part of class? If so, what will be your new objective statements and team roles?
